**Purpose of Contact:** *RFCA RSOP for Facility Component Removal, Size Reduction, & Decontamination Activities* Field Modification

## Discussion

A high pressure waterjet cutter was recently used to size reduce a tank in Building 774. Per Table 9 - Examples of Removal and Size Reduction Techniques of the *RFCA RSOP for Facility Component Removal, Size Reduction, & Decontamination Activities*, hard-sided containment is required. Prior to size reducing New T-40 in Building 774, the tank had been decontaminated and sprayed with a fixative to mitigate the spread of contamination during cutting activities. As a result, the use of hard-sided containment was not required by Building 771/774 Radiological Operations.

A field modification to alter the footnote in Table 9 was proposed to Ms. Onyskiw. Specifically, footnote H which stated "needs hard-sided containment" will be modified to read "containment as required by Radiological Operations." Ms. Onyskiw approved the modification. This contact record serves as the approval. Table 9 of the RSOP will be modified accordingly and submitted to the LRA within the next thirty days.
